SIWI FireSafe

Protect your investment and yourself.

- If a fire should occur, it is now possible to bring the tractor and driver to safety by using our NEW emergency disconnection system, SIWI FireSafe.
- FireSafe is a completely new construction for use in extreme situations as an emergency disconnection system.
- The disconnection with our FireSafe is done via a single press on the control box. All functions for the machine are disconnected in just one operation.

Installed between the K80 ball and the drawbar, the FireSafe system can disconnect:

- 10 Hydraulic Couplings
- Pneumatic/Hydraulic brakes
- Road Lights
- ISOBUS Connections
- Load Sensing System
- Different Control Boxes
- Requires one single acting service
