KRM

SM-P MiniSeed

KRM Sola MiniSeed : TECHNICAL SPECIFICATION

The MiniSeed has been designed specifically to work with the SM-P range of seed drills. One or two hoppers can be fitted alongside the drill hopper, giving a capacity of 185 or 370 litres. Where two hoppers are fitted they can be controlled independently, allowing two additional products to be applied in different positions and at different application rates.

Panier mounting the MiniSeed keeps the weight close to the tractor for reduced lift capacity. A loading platform and step provides easy access for filling and folds neatly away when not in use. Calibration is quick and easy and all settings are handled via the tractors in-cab display.

The following harrow mounted outlets can be positioned to spread the product into the sowing zone of the drill , ideal for under sowing or companion crops when the product needs to be incorporated. Or behind the following harrow for when the product must remain on the soil surface.

Standard Equipment includes :

- Pressurised hopper
- Sealed, hopper lid
- Elektra ISOBUS electric metering
- Stepless seed rate adjustment
- Hydraulic fan drive : requires up to 7-14 lt/min
- Sensor for hopper level
- Sensor for fan speed
- Forward speed & area counter

Optional Equipment includes :

- Smart 570 terminal & tractor loom (VT Only)
- Touch 800 terminal & tractor loom
- Touch 1200 terminal & tractor loom
- Task Controller TC
- Track Leader
- Section Control SC
- GPS Speed input
- GPS Antenna AG200
- GPS Antenna NAV900
